Closing

We are passionate about the possibility of reversing the millennia-old travesty of global mercury pollution resulting from artisanal and small-scale gold mining (ASGM). The miners aren't to blame. They have no alternative to using this potent neurotoxin in order to mine efficiently.

We are inspired by our opportunity to partner with the jewelry industry in the discovery of efficient alternatives so that 10 to 15 million people can mine without poisoning themselves, their families and the world. We have the ability to fly men to the moon and cars to Mars. Certainly, together, we have the ability to solve this!

Toby Pomeroy

Executive Director, MFM

Mercury Free Mining

Thank you

Your persistence drives us to build a mercury free world.
